

Canada Postcard Quilt

What you need:

- ❧ 1x each Canada Postcard panels
- ❧ .8m of 112cm solid cotton for sashing
- ❧ 2.5m of 112cm blender for border
- ❧ 2.5m of 112cm blender for backing
- ❧ quilt batting of your choice

What you do:

1. Cut the squares apart leaving the 1/2" border around each. (total 15 squares needed)
TIP: use the border of the panel as the seam allowance.

2. Cut 20 sashing strips 2.5 x 11.5" and 6 strips 2.5 x 46.25".

3. Arrange the blocks in the order that you'd like. Then, working left to right, sew on the vertical 11.5" sashing strips = sashing + square1 + sashing + square2 + sashing + square3 + sashing. Continue with other 4 rows.
TIP: If you turn the square to the wrong side you can use the border as your seam allowance.

4. Sew the horizontal 46.25" sashing pieces to the top and bottom of the 1st row, in between all rows and along the bottom.

5. Cut 2 vertical border pieces 6 x 60" and attach along side edges.

6. Cut 2 horizontal border pieces 6 x 46" and attach along the top and bottom edges to complete your quilt top.

7. Cut backing as fabric width x 72" length and layer backing (face down), quilt batting and quilt top (face up). Pin securely and trim. Baste close to edge.

8. Quilt as desired and bind edges.
