

DIY Button Earrings

Step 1:
Split open your jump ring with your pliers.

Step 2:
Loop in your button(s). Make sure the jump ring is large enough to fit through the holes of your buttons, as well as around the outside. We used an 8mm jump ring for this earring.

Continue attaching your buttons with the jump rings until you are satisfied.

Step 3:
Once your earring is done, attach ear wire to the top of the design and secure with a jump ring.

Supplies:

- Needle Nose Pliers
- Jump Rings
- Ear Wire
- Buttons of your choice
- Charms and/or Beads (optional)

Final Product:

Add charms or beads for extra flair!

Experiment with different styles!
The possibilities are endless!
