

# DIY MACRAME PLANT HOLDER

**Finished Length:**  
average length approx.  
130cm (51") long

*\* Size will vary depending on material used. Project can also be custom sized by altering the lengths of knots. If project is lengthened, more cord or macramé yarn may be required.*

## What you will need:

- 42 metres of cord trim OR two skeins of Macramé Yarn
- One 38mm (1 ½") O-Ring

## Instructions:

1. Cut eight cords, 5 metres long and two cords, 1 metre long. Take the eight cords and pull them halfway through the O-Ring.

*\*Please refer to the "**Macrame Knots Info Sheet**" with instructions on how to knot each of the following macramé knots.*

2. Take one 1 metre long cord and create a **Gathering Wrap** below ring. Wrap around 12 times or until the wraps measure approx. 5cm (2") long.

3. Divide cords into four groups (four strands per group). For each group, **Half Knot Spiral** until each measures 25cm (10").

Hang ring on a sturdy hook, or tape it flat on a surface to keep the ring in place, making it easier to work through the knots.

4. Drop down 15cm (6") and tie one Regular Knot for each group.

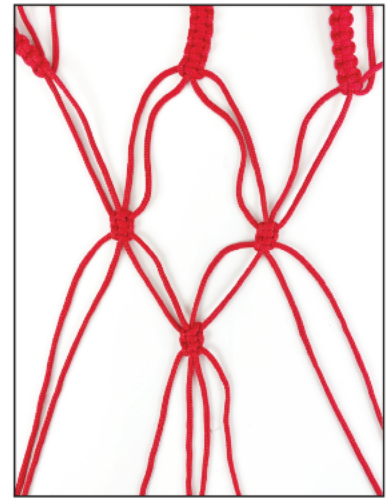

5. **Square Knot** until each group measures 25cm (10"). Use the shorter cords as the filler and the longer cords to make the knots.

6. Drop down 10cm (4"). Join two strands from one group and two strands from the group beside it and make **2 Square Knots**. Continue all around until you create four new groupings.

7. Drop down 8cm (3"). Join two strands from one group and two strands from the group beside it and make **2 Square Knots**. Continue all around until you create again four new groupings.

8. Drop down 8 cm (3") and gather ALL strands together with a **Gathering Wrap**, using the last 1 metre long cord. Wrap about 12 times or until the wraps measure approx. 5cm (2") long.

### Finishing:

Cut tassels off at 25cm (10"). Ends will naturally fray, OR tie tiny knots at the end of the tassels for a non frayed look.
